Alternator output	A	110	90 [120]	90 [120]	90 [120]	150	150
	W	1540	1260 [1680]	1260 [1680]	1260 [1680]	2100	2100

**1** The figure quoted includes a 90 % tank filling, 68 kg for the driver and 7 kg for luggage. Unladen weight applies to vehicles with standard equipment. Optional equipment may increase this figure.

**2** The overall weight of the trailer may not exceed the maximum permissible trailer load plus the maximum permissible towbar download.

**3** The petrol engines in the 3 Series Coupé are designed for RON 98 fuel. They may be run on fuel grades down to RON 91 with a slight decrease in engine power and an increase in fuel consumption.

**4** All engines in the BMW 3 Series Coupé meet the EU4 emissions standard, except for the diesel models with automatic transmission, which meet the EU3 emissions standard. Fuel consumption is determined in accordance with the ECE driving cycle made up of approximately one third urban traffic and two thirds extra-urban driving (based on the distance covered). CO<sub>2</sub> emissions are measured in addition to fuel consumption.

**5** Electronically limited. Values in [ ] apply to vehicles with five-speed EH automatic transmission.

The models illustrated in this brochure show the specifications for the **German** market. In part, they include optional equipment and accessories not fitted as standard. According to the specific requirements of other markets, alterations in models, standard and optional equipment, as described in the text and illustrations, may occur. For precise information, please contact your BMW partner. Subject to change in design and equipment.
